Appendix 1 Inventory of pollutants	9

#### 1. Purpose

This Pollution Incident Response Management Plan (PIRMP) has been developed to comply with requirements by the Protection of the Environment Operations Act 1997 (POEO Act) to prepare and implement a pollution incident response management plan.

The objectives of this plan are to ensure the timely communication of a pollution incident to all relevant groups and individuals to minimise and control the risk of a pollution incident occurring at the Regional Livestock Exchange (RLX) sites. It is also in place to ensure that the plan is properly implemented by trained staff and is regularly tested for accuracy, currency and suitability.

#### 2. Scope

This document applies to the following RLX sites:

- Central Tablelands Livestock Exchange (CTLX)
- Tamworth Regional Livestock Exchange (TRLX)
- Inverell Regional Livestock Exchange (IRLX)
- Hunter Regional Livestock Exchange (HRLX)

All sites have effluent management systems, stored fuel and chemicals which are used for site operational activities. This plan applies to all on-site activities.

#### 3. Distribution Policy

This plan will be made available to an authorised officer on request, a copy will be held at each of the RLX sites listed above and also published on each site's website. For information on RLX site locations please visit: www.rlx.com.au

#### 4. Definition of a Pollution Incident

Pollution incident means an incident of set of circumstance during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set or circumstances involving only the emission of any noise.

#### 5. Duty to report a pollution incident

Under the Protection of the Environment Operations Act 1997, there is a duty to immediately report an incident to the EPA, NSW Health, Fire and Rescue NSW, SafeWork NSW and the local council.

Harm to the environment is material if:

- It involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or
- It results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and

 Loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

# 6. Pollution Incident Contact details

# 6.1 Regulatory Authorities to be notified:

Authority	Telephone Contact
EPA NSW	131 555
SafeWork NSW	131 050
NSW Health	02 9391 9000
Fire and Rescue NSW	000

#### 6.2 Site Contacts:

#### 7. Notification

Pollution incidents posing material harm to the environment must be notified to the Environmental Protection Authority.

The relevant information about a pollution incident required to be reported consists of the following:

- a) The time, date, nature, duration and location of the incident,
- b) The location of the place where pollution is occurring or is likely to occur,
- c) The nature, the estimated quantity or volume and the concentration of any pollutants involved, if known,
- d) The circumstances in which the incident occurred (including the cause of the incident, if known),
- e) The action taken or proposed to be taken to deal with the incident and any resulting pollution or threatened pollution, if known.

If the information required by c), d), or e) is not known when the initial notification is made but becomes known afterwards, that information must be notified to the relevant authorities immediately after it becomes known.

### 8. Notification Responsibilities

The following people have a duty to notify a pollution incident occurring that causes or threatens material harm to the environment:

- · The person carrying on activity
- · An employee engaged in carrying on the activity
- The employer carrying on the activity
- · The occupier of the premises where the incident occurs

An incident does not require notification, if the person is aware that the incident has already come to the notice of each person or authority required to be notified, or if the incident is an ordinary result of action required to be taken to comply with an EPL, or environmental protection notice.

#### 9. Community and stakeholder notification

All community and stakeholder notifications will be undertaken in line with this document and the Environmental Protection License.

Neighbouring residents will be notified by phone or door knocking.

Livestock agents and transporters will be notified by email or phone, so they can inform their clients, if the pollution incident will affect the use of the saleyards.

# 10. Incident response actions

Type of incident	Preparation	Response actions
Minor spill of potential pollution substance (< 20 L )	Awareness training for team members.  MSDS on site for all materials and kept up to date.	Report spills immediately to the Site Manager, and relevant authorities where required (refer Section 5 & 6).  Only attempt to contain the spill if safe to do so.  Site Managers and staff to coordinate the response and clean-up of the spill.  Monitoring and follow up reporting to be carried out as per EPL License conditions.
Major spill of potential pollution substance (> 20 L )	Awareness training for team members.  MSDS on site for all materials and kept up to date.  Emergency contact details displayed on site.	Report spills immediately to the Site Manager, and relevant authorities (refer Section 5 & 6).  Notify appropriate emergency services.  Where appropriate, evacuation procedure to be implemented until pollution substance is contained.  Only attempt to contain the spill if safe to do so.  Site Managers to coordinate the response and clean-up of the spill.  Monitoring and follow up reporting to be carried out as per EPL License conditions.
Flood	Awareness training for team members.  Monitor weather conditions and flood warnings.	All chemicals and fuels are stored in secured containers away from potential flood affected areas.  Effluent pond levels will be managed where possible to reduce the risk of potential overflow events and minimise impacts.  Monitoring and follow up reporting to be carried out as per EPL License conditions.

#### 11. Pre-emptive actions

The following are pre-emptive actions that are implemented at RLX sites to assist with minimising the potential for a pollution incident to occur:

- Staff inductions
- Weekly staff meetings
- Saleyard advisory meetings
- · Environmental monitoring and reporting
- Staff training
- · Annual safety audit
- Use of SDS information

For the full list of chemicals kept on site, refer Appendix 1.

#### 12. Safety Equipment

Safety equipment located on site includes:

- Fire extinguishers
- First Aid Equipment
- SDS's kept in maintenance shed and the administration office (A register has been compiled
  of dangerous goods, a copy is to be kept in the office and maintenance shed)
- PPE located in maintenance shed/office.

Audit of all safety equipment and controls is undertaken annually.

See Appendix 3 for site maps showing locations of evacuation assembly areas, fire extinguishers and first aid equipment.

#### 13. PIRMP testing

The PIRMP, it is to be tested annually to ensure that the information included in this plan is accurate and up to date, and that the actions are workable and effective. The plan will be updated to reflect any changes to actions as a result of the testing and other details as required.

#### 14. Staff training

Staff training is recorded in monthly and quarterly management reports and records are maintained on site.

As part of the RLX Site Inductions, all team members and contractors are provided with information on possible pollutants and the procedures and processes in place to manage and minimise environment risk.
